

300 HL BREWHOUSE AT UB SHAHJAHANPUR

Brownfield expansion of 300 HL fully automated brewhouse in UB Shahjahanpur, Rajasthan.

Supplied the complete brewhouse including the malt and rice bins, along with the conveyors and the dust collector system, CIP tank as well as the Hop dosing system.

LEHUI was able to achieve 9 brews per day with a new generation Lauter Tun, with latest advanced technology, less occupancy time of the wort, less time for spent grain removal and achieved a brewhouse recovery of 98.5 %.

This project was the First of its Kind for United Breweries in India, where the equipment were brought out in full knock down condition from China. LEHUI, with its experience and expertise of handling more than 500 projects all around the globe for esteemed customers like HEINEKEN & Bavaria group, completed the on site fabrication, installation and commissioning in record time.

In fact the complete installation and commissioning was completed in 3 months straight which also included the on site assembly and fabrication of the equipments shipped from China.

300 HL BREWHOUSE AT UB SHAHJAHANPUR

The project execution, Lehui's strong project management and Performance of the equipments received encouraging reviews from UB, which has given LEHUI a strong headfast into the Indian Market and building on this positive reputation, LEHUI will be looking forward to have more and more orders from clients in the future.

CHEERS!!!!
